

Vinit Umesh Sontakke

DATA ENGINEER

Python | SQL | Snowflake | ETL/ELT | Data Warehousing | Cloud | Git

vinitontakke27@gmail.com | +91 78877 13347 | CSN, Pune | [LinkedIn: Vinit Sontakke](#) | [GitHub: Vinit Sontakke](#)

PROFILE SUMMARY

Data Engineer with 1+ years of experience in ETL/ELT, SQL, Python, and Snowflake. Experienced in data integration workflows involving SAP S/4HANA, ADLS Gen2, and Snowflake, with exposure to SQL transformations, data cleansing, incremental processing, and data-quality validation. Skilled in preparing analytics-ready datasets and supporting reporting requirements and KPIs. Working knowledge of Star Schema, PySpark, Databricks, and AWS (S3, EC2), with hands-on PySpark experience through personal projects.

TECHNICAL SKILLS

Programming: Python (Pandas, PySpark), SQL (T-SQL, MySQL, Complex Joins, CTEs, Window Functions)

Databases & Cloud: SQL Server (SSMS), Snowflake, Azure (ADLS Gen2), AWS (S3, EC2), Databricks (Basics)

Data Engineering: ETL/ELT Pipelines, Batch Processing, Incremental Loading, Data Ingestion & Integration, Data Cleansing, Data Validation & Quality Checks

Sources & Integration: SAP S/4HANA, ADLS Gen2, SQL Databases, REST APIs, Parquet, JSON, CSV

Data Modeling: Dimensional Modeling, Star Schema, Fact & Dimension Tables, Data Warehousing

Practices: Git, Agile/Scrum, SDLC, Code Review, Unit Testing, Technical Documentation, Windows, Linux

WORK EXPERIENCE

Data Engineer - Inteliment Technologies, Pune

12/2025 - 07/2026

- Worked on ETL/ELT pipelines with SAP as an upstream source, supporting data integration and downstream analytical processing.
- Worked with data stored in Azure Data Lake Storage (ADLS) in Parquet format, with ingestion and pipeline orchestration managed through Azure Data Factory (ADF).
- Developed SQL-based transformations in Snowflake using Joins, CTEs, Window Functions, Aggregations, Filtering, and Deduplication to prepare analytics-ready datasets.
- Implemented incremental data processing using Change Data Capture (CDC) concepts to identify and process new and updated records, reducing unnecessary full-data processing.
- Used Snowpark Python for data-quality validation and programmatic data processing within the Snowflake environment.
- Performed source-to-target validation and reconciliation using record-count comparisons, null checks, duplicate checks, and data-consistency validations.
- Worked with Fact and Dimension tables following Star Schema dimensional modeling concepts to support analytical reporting and data warehousing.
- Contributed to ETL testing, troubleshooting, technical documentation, and Git-based version control while working within an Agile/Scrum environment.

Junior Data Engineer Intern - ThirdOrigin LLC, US (Remote)

10/2024 - 04/2025

- Developed ETL workflows using Python (Pandas) and SQL to process data from CSV files and SQL databases.
- Performed data cleaning and transformation using Pandas, including null handling, duplicate removal, data-type correction, filtering, and derived columns.
- Developed SQL transformations using Joins, CTEs, Window Functions, Aggregations, CASE statements, and Views.
- Prepared curated datasets as processed output files for downstream analysis and reporting.
- Performed data-quality checks and source-to-target validation, including record counts, nulls, duplicates, and data consistency.
- Contributed to testing, troubleshooting, documentation, and Git-based version control in an Agile/Scrum environment.

EDUCATION

Bachelor of Technology (CSE) - CSMSS Chh. Shahu College of Engineering, Chhatrapati Sambhajinagar, Maharashtra

Graduated: July 2024 | CGPA: 7.96
