PROFILE SUMMARY

Data Engineer with a year of hands-on experience in designing and developing ETL/ELT pipelines using SQL Server (SSMS), Python (Pandas). Skilled in data extraction, transformation, cleansing, validation, and loading from multiple data sources to support reporting and analytics. Strong foundation in Data Warehousing, dimensional modeling using Star Schema, data integration, and data quality. Possesses project experience with PySpark and MySQL, along with a good understanding of SDLC, Agile/Scrum methodologies, Git version control, and technical documentation.

SKILLS

- **ETL/ELT Development:** SQL, Python (Pandas), PySpark
- **Tools:** SQL Server Management Studio (SSMS), MySQL, Databricks
- **Data Modeling & Warehousing:** Data Warehousing, Data Lakes, Data Architecture, Data Modeling, Star Schema Design
- **Cloud:** AWS (S3, EC2)
- **Methodologies:** SDLC, Agile/Scrum, Code Review, Testing, Technical Documentation
- **OS:** Windows, Linux
- **Version control:** Git

WORK EXPERIENCE

Data Engineer, Inteliment Technologies

12/2025 – 07/2026 | Pune

- Collaborated with business stakeholders and business analysts to understand business requirements, reporting needs, and key business KPIs, translating them into data pipeline and reporting solutions.
- Extracted data from multiple source systems, including SQL databases and CSV files, using Python (Pandas), and performed data cleansing, validation, and preprocessing by handling missing values, duplicate records, inconsistent data formats, and data quality issues.
- Loaded cleaned and validated data into Snowflake, building a centralized cloud data warehouse and contributing to the underlying data architecture to store reliable, analysis-ready datasets for business reporting and analytics.
- Developed SQL/T-SQL scripts using joins, CTEs, window functions, aggregations, and views to transform raw data into business-ready datasets aligned with reporting requirements.
- Assisted in designing fact and dimension tables using Star Schema concepts to organize analytical data, improve query performance, and support efficient reporting across the data warehouse and data lake layers.
- Prepared curated datasets in Snowflake, consumed by the Business Intelligence (BI) team to develop Power BI dashboards for monitoring business KPIs, operational metrics, and performance trends.
- Optimized SQL queries and data transformation logic to improve query performance, data accuracy, and overall data processing efficiency, while advising on schema design decisions with the BI team.

Junior Data Engineer Intern, ThirdOriginLLC

10/2024 – 04/2025 | US (Remote)

- Extracted and ingested data from SQL databases, CSV, and Excel files using Python (Pandas), performing initial data cleansing and preprocessing by handling missing values, duplicate records, and inconsistent formats.
- Developed SQL scripts using joins, CTEs, window functions, aggregations, and views to transform raw data into business-ready datasets aligned with reporting requirements.
- Assisted in designing fact and dimension tables using Star Schema concepts to organize analytical data, supporting scalable data architecture, improved query performance, and efficient reporting.
- Performed data validation, data reconciliation, and data quality checks to ensure data accuracy, integrity, and consistency before downstream consumption.
- Prepared transformed, analysis-ready datasets used to develop Power BI dashboards for monitoring business KPIs, operational metrics, and reporting needs.
- Collaborated with developers and cross-functional teams in an Agile/Scrum environment, contributing to testing, debugging, and technical documentation, while using Git for version control and following SDLC and data governance best practices.

EDUCATION

B.Tech (Computer Science and Engineering),

CSMSS Chh. Shahu College of Engineering

Bachelor of Engineering in Computer Science and Engineering, CSMSS College of Engineering Graduated July 2024 (CGPA: 7.96).

06/2020 – 07/2024

Chh. Sambhajinagar, Maharashtra
